

Madigan Library

For the Madigan Library at the Pennsylvania College of Technology, Murray Associates Architects chose VT Industries as the manufacturer for the **Laminart® Faced Wood Doors**. The AG Mauro Company was the distributor for this project, and has been supplying VT products for each phase of the college's construction and renovation. The library is 104,000 square feet, and houses 117,000 items in support of the curriculum. The state-of-the-art Madigan Library also serves as an art gallery, live music venue, café, computer laboratory, and archive for the college.
