

Product Update

MAY 24, 1999

#P130FSR

Revision 00

Applies to Flush and Stile & Rail doors

BHMA WEB SITE

Builder's Hardware Manufacturer's Association announced at the 1999 WDMA Annual Meeting that beginning the summer of 1999, hardware templates will be available on the Internet.

BHMA's Web Site is: www.buildershardware.com

Site contains:

- Directories of Certified Products
- Hot Links to various manufacturers' sites
- Internet Standards Order
- BHMA Finish Match Plates

This will provide our customers and VT project coordinators with the most updated templates available. However, the correct template will need to correspond with the hardware being used on the project. This may or may not be the latest template, so please carefully check your paperwork before entering.
